It commemorates the Swiss Guards who were massacred in 1792 during the French Revolution, when revolutionaries stormed the Tuileries Palace in Paris, France. Named after the nearby St. Peter's Chapel, the bridge is unique since it contains a number of interior paintings dating back to the 17th century, although many of them were destroyed along with most of the centuries old bridge in a 1993 fire. Subsequently restored, the Kapellbrücke is the oldest wooden covered bridge in Europe, as well as the world's oldest surviving truss bridge. It owes its creation to the Feldberg glacier, the moraine ploughed up by which in the Pleistocene epoch nowadays forms the lake's shores. The lake's outflow, at 840 m above sea level, is the river Gutach (or as it is called farther downstream, the Wutach). On the north shore lies the spa town of the same name, today a part of the municipality of Titisee-Neustadt.
